

*TSE Systems is one of the leading developers and manufacturers worldwide of state-of-the-art measuring and evaluation systems as well as methods and procedures for biological, clinical and pharmaceutical research. An interdisciplinary team of scientists and engineers regularly provide innovations. All systems are continually being optimized in close cooperation with specialists from the fields of science and medicine using the latest techniques. In order to complete our teams we are looking for the following position, to be filled immediately or later:*

## **Service and installation engineer (m/f)**

**Ref.: TSE-607008**

After appropriate intensive training your responsibilities are the installation, service and repair of our measuring and evaluation systems on the premises of our customers throughout the world as well as their assembly and testing before delivery. You will also carry out training courses on our systems and make all the technical preparations for your assignments. You will work in close cooperation with your colleagues and will be happy to make frequent business trips, also abroad.

Your qualifications should include a completed engineering study (university/technical college). You have a thorough understanding of electrotechnology and mechanics and are familiar with handling measurement and calibration equipment. You have at least 3 years occupational experience as a service or installation technician. In addition you should have a good knowledge of German and English and very good computer knowledge (hardware and software installation, MS Office) as well as a driving license.

Your **workplace** is our **headquarters in Bad Homburg** (near Frankfurt/Main), which is very easy to reach with both public and private transport. You will be working in modern office surroundings and can benefit from being close to the town center.

If you would like to contribute by accepting responsibility for the success of an innovative and internationally expanding company we can offer you good chances for your further personal development.

Please submit your detailed CV together with the salary you require and your possible starting date to the contact address given.

***We would be pleased to see you!***
